

CARES Act 2020 ESSER Funds Overview

For Coshocton City Schools Board of Education

June 4, 2020

How much?

Coshocton City Schools initial allocation = \$580,479.63

Non-public share = \$28,071.55 or \$18,406.55

*Federal guidelines on the amount determination process for the nonpublic share is still being determined, as for now we must set aside the larger amount

Total for CCS = **\$552,408.08**

Guiding Questions:

- How did we determine the most important educational need resulting from COVID-19?
- How will the district assess and address student learning gaps resulting from COVID-19?
- What will our timeline be for providing services and assistance to students and staff with the funds?
- To what extent will we use the funds to promote remote learning?

General Allowable uses of the funds:

Address students with unique needs (ie: students with disabilities, homeless students, foster placed students and low-income students)

Address system needs: training for staff for remote/blended learning, training for sanitization and minimizing disease spread, planning for potential long term closures

Purchasing items: ie: cleaning/sanitizing supplies and technology related to education for students

Providing services: ie: mental health

Planning: Developing plans and implementing for various activities ie: summer school, meal service and others during long-term closures, procedures and response efforts

Other uses:

Many other options for supplies, services, and activities as long as they can be justified as they would be with other federal programs.

*We will need to plan our initial budget but allow for flexibility as we continue to have additional needs arise.

Note: This is a one time infusion, and there is not a plan to have this again.
